Construction Inheritance

Transfer of know-how from older construction workers to young ones

– Dissemination Activities –

Dissemination plan

Communication is a broad concept. It includes information activities and advocacy to raise awareness and improve visibility of the project activities, in addition to the dissemination and use of project results.

FLC, as project coordinator, is in charge of managing the proper implementation of dissemination activities, always with the support and collaboration of the whole partnership by a continuous spreading of project results targeted to several regional and state entities by means of corporate websites, newsletters, leaflets, piece of news, etc.

The main objective of this plan is the continuous dissemination of project's milestones and results during its lifetime, with the aim of getting the maximum impact within the target groups concerned, the designated sectors and the potential users.

The goals of the dissemination and exploitation of project include:

- Sensitize;
- Expanding the impact;
- Maximize the potential of the action financed;
- Ensure involvement of stakeholders;
- Share the solution and practical knowledge;
- Contribute to the implementation and development of European training systems;
- Influence policies and practices.

Target groups and stakeholders

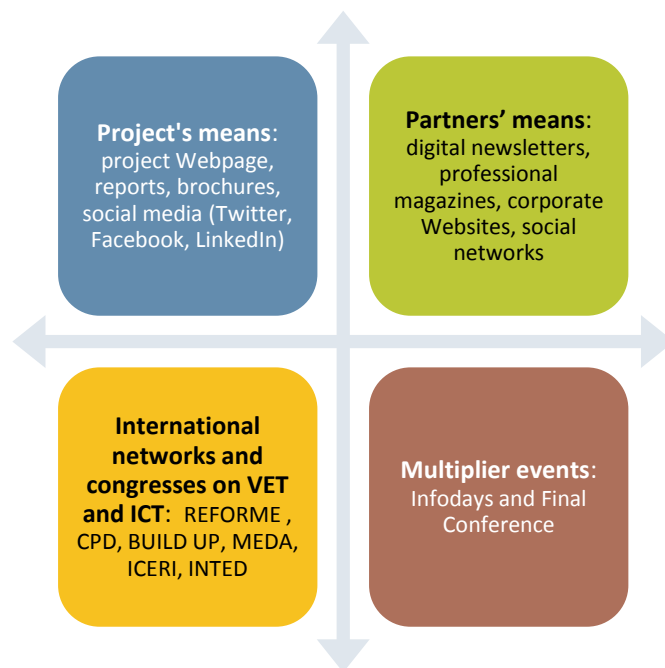

The fact of reaching the maximum possible potential users through effective dissemination will help to get a return on investment.

Educational scope	Sectoral scope	Technical scope
<ul style="list-style-type: none"> •Public bodies: Ministries of education, National Institutes for Qualifications, General directorates... •Training organizations, such as Foundations •International networks •VET centres and HE institutions •Trainers and trainees 	<ul style="list-style-type: none"> •Public bodies: Ministries of employment, Chambers of commerce... •Building sector social partners: Trade unions and Employers associations •Active and retired workers •Building companies 	<ul style="list-style-type: none"> •Technical institutes on building activities. •Universities. •ICT providers

Means and communication channels

Several means will be put into motion to inform about project development and its outputs, namely:

To reach the maximum target audience, all project results and some communication materials are translated to all the languages of the partnership and into English.

Dissemination activities with project's means

Design of project logo

Project Website

All project information is published on a specific website developed by FLC. In this website it can found the description of the project, the phases, project events, news and a downloading area where there are available all the products developed. The website extension is “.eu”, in order to foster its divulgation internationally. Also connection with social networks will also be available to transfer new contents trough the social profiles already to be created on Facebook and LinkedIn, as a means of future promotion.

The contents of Webpage are available in the partnership language of the project, which is English.

With the aim to ensure an optimal exploitation of results through whole project life-cycle and also after its end, the site is going to be maintained during three years once the project had finished.

La Fundación Laboral de la Construcción participa en cuatro nuevos proyectos europeos, dentro del programa Erasmus+

Interviene en dos de ellos como coordinador y como socio en los otros dos

La Comisión Europea ha concedido a la Fundación Laboral de la Construcción cuatro nuevos proyectos europeos, a través del programa Erasmus+, y enmarcados en la línea de acción K2 (Cooperación para la innovación y el intercambio de buenas prácticas), en los proyectos destinados a promover los 'patrimonios' en favor de la formación profesional.

La entidad partiría intervendrá en dos de ellos como coordinador y en los otros dos, en calidad de socio.

- Transferencia de conocimientos de los trabajadores de la construcción a los más jóvenes (Construction Inheritance). Octubre 2015-octubre 2017.

Esta iniciativa, destinada a jóvenes trabajadores, tiene el objetivo de desarrollar una app de carácter formativo, basada en los conocimientos de los profesionales con experiencia en actividades tradicionales de la construcción.

Además de evitar la pérdida de este valioso know-how, será posible formar a los trabajadores más jóvenes en técnicas necesarias para actividades específicas que se demandan actualmente, como son las relacionadas con la rehabilitación de edificios antiguos.

La Fundación Laboral de la Construcción es coordinador de este proyecto, por lo que deberá organizar y controlar su adecuado desarrollo, para que éste cumpla con los requisitos técnicos y presupuestarios.

Los socios de este proyecto son: BZB - Baukollaboration des Baugesamtes e.V (Alemania), Formedit Puglia (Italia), Centre Habitat Liège-Huy-Waremme (Bélgica), OCCA-BTP (Francia) y Cefic (Portugal).

Section “Training →International”. All the information about Construction Inheritance project (partners, budget, phases, outputs, etc.). Published on 25/09/2015.

<http://www.fundacionlaboral.org/formacion/internacional/formacion/proyecto/construction-inheritance-2015-2017> [Accessed 14/01/2016]

The screenshot shows the website of Fundación Laboral de la Construcción. The header includes the organization's name, a list of regional offices, a phone number (900 11 21 21), and a search bar. The main navigation menu includes 'FUNDACIÓN', 'FORMACIÓN', 'SEGURIDAD Y SALUD', 'EMPLEO', and 'BLOG'. The 'FORMACIÓN' section is active, with sub-tabs for 'NACIONAL' and 'INTERNACIONAL'. The 'INTERNACIONAL' tab is selected, showing the 'Formación' title. Below the navigation, there is a search bar with fields for 'Palabra clave:' and 'Año:', and a 'Buscar' button. The main content area features the 'Construction Inheritance (2015-2017)' project. It includes a description of the project's goal to transfer knowledge from experienced workers to young people, a list of social media icons, and a sidebar with logos for the European Union, Erasmus+, and various partner organizations. The project details listed are:

- Proyecto perteneciente al Programa ERASMUS + Convocatoria 2015**
- Duración:** Desde Octubre 2015 hasta Septiembre 2017
- Presupuesto:** 246.240€
- Coordinador del proyecto:** Fundación Laboral de la Construcción (España)
- Socios:** 62B (Alemania), Formedil Puglia (Italia), Centre IFAPME Liège-Huy-Waremme (Bélgica), CGCA-BTP (Francia), CENPIC (Portugal)
- Webster:** Próximamente

Erfahrungswerte aus der Altbausanierung

Wir berichten Ende letzten Jahres bereits zum Start des ERASMUS+ Projektes [Construction Inheritance](#) darüber, dass neue Inhalte für den Bereich Altbausanierung in digitaler Form entstehen werden. Zur Zeit ist die erste Projektphase nahezu beendet. Es wurden Fachleute und Praktiker in sechs EU-Ländern dazu befragt, wie sich die praktischen Gegebenheiten in der Altbausanierung darstellen.

Faktoren wie

- 1) Besonderheiten für Unternehmen und Kunden,
- 2) besonders relevante Materialien, Produkte und Anwendungen,
- 3) spezielle Aspekte auf Bauteilen zu Organisation und Vorschriften,
- 4) Personaleinsatz und -rekrutierung sowie
- 5) Ausbildung und Vermittlung von Know-how

sind Hauptaspekte der Befragungen gewesen. Darüber hinaus liegt aus jedem Land eine auch mit visuellen Medien erstellte Fallstudie in der Altbausanierung vor. Ein späteres Ziel ist es, jungen Menschen mit Hilfe einer APP das Wissen erfahrener Mitarbeiter in der Altbausanierung in Ausschnitten digital zur Verfügung zu stellen, sie ggf. dem Sektor näher zu bringen damit Wissen, Fertigkeiten sowie Kompetenzen aufgrund des demographischen Wandels nicht verloren gehen.

Die [Projekt Internetseite](#) liefert weitere Informationen.

Mit vier EU-Projekten am Start

Nachdem die BZB im abgelaufenen Jahr 2 europäische Projekte erfolgreich abgeschlossen haben, gehen Sie mit folgenden vier Projekten ins neue Jahr:

SoMeX - Social Media in Exchanges, Entwicklung u.a. einer APP, die die Mobilität von Auszubildenden mit Hilfe moderner social media unterstützen und erleichtern soll.

KPI VET - Key Performance Indicators in Vocational Education and Training, Es werden Schlüsselindikatoren für die Erfolgsmessung und die Erfolgsbeurteilung von Berufsbildungs-einrichtungen entwickelt.

ConstructivVET - Die Passgenauigkeit von Berufsbildungsangeboten und den Bedarfen der Firmen in der Bauwirtschaft wird analysiert und besser in Einklang gebracht. Insbesondere die Ebenen 4 und 5 des Europäischen Qualifikationsrahmens sind dabei von Interesse, in Deutschland betrifft dies zum Beispiel die Bereiche Vorarbeiten, Werkpolier und Geprüfter Polier. Internetseite noch im Aufbau.

Construction Inheritance - Klassische Formen des Bauhandwerks zu erhalten und mit Mitteln moderner Medien und digitaler Kommunikation vom Verschwinden zu bewahren, sind zwei Facetten in diesem Projekt, das noch ganz am Anfang steht. Internetseite noch im Aufbau.

INCOM-VET - Intercultural Competences for the construction sector, Hierzu legen die Endprodukte vor, die unter info@bzb.de in digitaler Form angefordert werden können.

AR-Key - Augmented Reality for Key Competences in the construction sector. <https://www.google.com/websearch?q=ar-key>. Die Endprodukte liegen vor.

Nähere Informationen finden Sie auf der BZB-Internetseite unter Europäische Projekte sowie natürlich auf den o.g. Projektinternetseiten, sofern sie sich nicht noch im Aufbau befinden.

LES NEWS

CONSTRUCTYVET : ASSURER L'AVENIR DES JEUNES ET DES ENTREPRISES

C'est de cet enjeu qu'est né le projet ConstructyVET, porté et piloté par le CCCA-BTP et son réseau de l'apprentissage BTP en partenariat avec les membres du réseau REFORME. Fondé sur l'analyse des besoins en compétences transverses des entreprises des pays partenaires, ce projet a pour objectif de développer un plan d'actions transnational afin d'adapter la pédagogie de l'apprentissage aux formations de niveaux IV et V, grâce à la modularisation des parcours et à l'utilisation du numérique.

BTP MOBILITÉ + : UN PROJET EUROPÉEN POUR TOUS

Avec BTP Mobilité +, piloté par le CCCA-BTP, le réseau des CFA du BTP souhaite favoriser la mobilité et l'employabilité des jeunes. Ce projet encourage le développement des compétences avec des secteurs professionnels dans d'autres pays européens pour les apprentis, les formateurs et les personnels de direction des CFA. Ainsi, deux promotions du BTP à composante européenne de trois régions pilotes (Centre, Champagne-Ardenne et Pays de la Loire) en bénéficient, ainsi que les apprentis en travaux publics. 17 formateurs de CFA ayant effectué en juin dernier un stage au Danemark sur l'organisation de l'apprentissage du BTP, et 28 personnels de direction.

CAP SUR L'EUROPE !

Soucieux de renforcer les parcours européens de formation des jeunes et de toujours investir dans la qualité de la formation, le réseau de l'apprentissage BTP mène une politique européenne active.

Le CCCA-BTP s'engage pleinement afin de contribuer au développement de l'excellence de la formation professionnelle initiale par l'apprentissage et anticiper l'évolution des métiers et des besoins du marché européen de demain. Membre du réseau REFORME, rassemblant les organismes de formation aux métiers du BTP dans neuf pays, le CCCA-BTP contribue à cultiver l'ouverture d'esprit des jeunes, à développer leur autonomie sur les chantiers, en leur permettant de découvrir d'autres pratiques professionnelles et environnements de travail. ●

CONSTRUCTION INHERITANCE : DES FORMATIONS ADAPTEES A LA RESTAURATION DU PATRIMOINE

Le projet Construction Inheritance, prévu pour la période 2015-2017 et piloté par le réseau espagnol FLC (Fondación Laboral de la Construcción), membre du réseau REFORME, a pour objectif de valoriser les savoirs de la restauration du patrimoine en proposant aux entreprises des formations adaptées et coordonnées ainsi à une meilleure attractivité de la filière dans les pays partenaires. Au vu de la demande du marché, le secteur de la restauration du patrimoine est en pleine expansion et les chantiers nécessitent l'expertise d'ouvriers qualifiés dans certains métiers traditionnels comme la restauration de façade, la trépannerie artisanale, la charpente ou la plâtrerie.

CERTIVET : UN CADRE COMMUN POUR LES FORMATEURS DE LA FINITION

Conçu pour développer le perfectionnement professionnel des formateurs et des maîtres d'apprentissage du secteur, le projet CertiVET (2014-2016) vise à créer un référentiel de formation commun aux trois pays partenaires (France, Pologne, Roumanie), à élaborer des procédures de validation des acquis des compétences, à concevoir des parcours d'autoformation et à proposer des certifications communes. Il est porté par l'Institut de recherches technologiques et pédagogiques polonaises ITPE. Le CCCA-BTP participe à ce projet avec la réalisation d'une analyse comparative des ressources existantes pour identifier les bonnes pratiques, avant de proposer un référentiel commun.

VALOR Dissemination Platform

This Dissemination and Exploitation platform offers a comprehensive overview of all projects funded under the Erasmus+ and Creative Europe programmes as well as some projects funded under the previous programmes (LifeLong Learning, Youth in Action, Culture 2007-2013, etc.).

The VALOR Dissemination Platform aims to ensure transparency, with the complete display of project information to the wider public. The purpose is to provide an information tool for the public for relevant and interesting content of DG EAC's projects, to highlight projects qualified as good practices and success stories, to become a source of inspiration for cultural organisations and initiators, to become a potential source of information for the Commission Open Data Portal, to serve as a project database (project summaries, links, main products and outcomes) and at a later stage to serve as a community of practice for projects.

The VALOR Dissemination Platform is updated regularly, every time the project has new information available.

<http://ec.europa.eu/programmes/erasmus-plus/projects/eplus-project-details-page/?nodeRef=workspace://SpacesStore/8440bc77-5792-415e-af0e-da34414fe404>

International networks and congresses on VET and ICT

The involvement of partners in European networks, professional congresses and events assures a very **significant impact at a European and international level** which transcends the mere dissemination by means of the incorporation, multiplicity and transfer of project outcomes in other institutions similar to project participants (VET entities, construction sector organisations, etc.).

Specifically, project dissemination in Europe has been carried out during this period throughout the participation of the partners in the international networks RE.FORM.E and CPD. Therefore, the targeted audience has been mainly project managers from companies working in EU projects as well as VET centres of construction sector.

CPD

Conference on Project Development network

Germany, U.K., Belgium, Holland, Sweden, Finland, Italy, Spain, Turkey, Slovenia, Lithuania and Bulgaria

Conference on Project Development (CPD) network was funded in 2010, with the involvement of more than 20 entities coming from 12 European countries. Its aim is to jointly design and develop strategic projects of common interest in the field of VET, as well as disseminate results of ongoing projects. This network organises two annual meetings; second part of these meetings is always devoted to spread out projects results.

I Annual meeting: 11th January 2016

During this meeting, held in January 2016 at Madrid at FLC headquarters, Construction Inheritance project was presented to all attendees: programme, funds, objectives, phases, methodology and expected results. It has to be said that the project caused big interest, where further information about it was requested by some attendants.

RE.FORM.E**RE.FORM.E network**

Germany, Belgium, Spain, France, Italy, Portugal, Finland, Sweden and Switzerland

In 1986, paritarian bodies of different European countries responsible for vocational training in the construction sector created the RE.FORM.E network, which aims to promote the professionalization of the sector by training young professionals and trainers of construction industry. Currently, eleven organizations from nine European countries are represented. All the six project partners are involved in this network which meets twice a year in different countries, where there is always time scheduled for spreading out ongoing projects with the aim of learning from other successful experiences.

CONSTRUCTION INHERITANCE

Transfer of know-How from older construction workers to young ones.

18 February, 2018 by REFORME Ongoing project

PROMOTER

- FLE / Spain
- (<http://madrid.fundacionlaboral.org/>)

CONTACT PERSON

- gonzalez@fundacionlaboral.org
- bolero@fundacionlaboral.org

LINK

- <http://www.fundacionlaboral.org/formacion/la-futura>

The present project aims at recapturing the know-how of workers with great experience in the traditional processes applied to the building industry, but due to some structural and production factors, such as works specialization or productive processes industrialization, great part of this know-how is being lost for the next generations, jeopardizing the necessary generational change.

Therefore, project aims to collect both factual knowledge and competences regarding traditional techniques of restoration, in order to facilitate its transfer through training to young professionals from construction industry, guaranteeing that way its future preservation, the generational change as well as a proper restoration of traditional elements of old buildings.

The partnership is composed by: BZB (Germany), Formedil Puglia (Italy), Centre IFAPME Liège-Huy-Waremme (Belgium), CCCA-BTP (France), CENRIC (Portugal).

TITLE H3 FOR EXAMPLE 22 PX

The main objective of this new common initiative is to provide teachers and trainers – specialised in construction crafts – with appropriate pedagogical methods and tools, defined at the common European level and adjustable to specific national contexts, enabling them to include the energy and climate change topics to the specific training programmes addressing learners (pupils, apprentices and adults). In order to be pragmatic and to achieve tangible and useful results, transferable from one country to another and from one professional context to another, the project is limited to the construction sector crafts and all the partners must be organisations or institutions involved in the vocational training related to the building industry.

Multiplier events: Infodays

The info-days are multipliers events that each partner has committed to organize together with the transnational meetings envisaged in the project. Therefore, it is assumed to organize 6 Infodays, one per country. During these events is expected the participation of all project partners as well as stakeholders coming from local public authorities, training centres, companies, current and potential workers, students, etc.

Infoday 1 “La Herencia de la construcción”

Madrid (ES) | 30th October 2015

Agenda and invitation

FUNDACIÓN LABORAL DE LA CONSTRUCCIÓN

Infoday del proyecto Erasmus+ la "Herencia de la Construcción"

Estimado/a amigo/a,

La **Fundación Laboral de la Construcción** ha sido beneficiaria de un nuevo proyecto **Erasmus+** denominado la "**Herencia de la construcción**". El proyecto tiene como objetivo **recuperar los conocimientos** de los trabajadores con gran experiencia en procesos tradicionales aplicados al sector de la construcción que, por un motivo u otro, se están perdiendo.

A este respecto, el próximo **viernes 30 de Octubre** celebraremos en las instalaciones de la Fundación sitas en Calle Rivas, 25 (Vicalvaro, Madrid), un infoday para lanzar el proyecto, al que nos gustaría invitarte. La **agenda** prevista es la siguiente:

12:15. Bienvenida y breve introducción a los proyectos ERASMUS+
12:30. Proyecto la "Herencia de la construcción"
13:30. Preguntas y debate
14:00. Clausura
14:30. Vino español

Si estás interesado/a en asistir, por favor cumplimenta el registro que encontrarás en el siguiente [enlace](#).

Atentamente,

Javier González López
Responsable de proyectos internacionales

Event Description (summary)

The **Infoday1** is the **first multiplier event** envisaged within project implementation; an information day with the objective of presenting Construction Inheritance project, in order to catch the interest and engage main stakeholders to ensure project's impact and create an enabling environment for welcoming the training programme in VET systems and institutions.

The event was planned as one day conference with the participation of the partners involved in project's development: Fundación Laboral de la Construcción (Es), CENFIC (Pt), BzB (De), FORMEDIL Puglia (It), IFAPME (Be), CENFIC (Pt) and CCCA-BTP (France).

The event was conducted by **project leader FLC**. The conference had duration of two hours, attended by the representatives of the construction companies, professionals, VET trainers, and ICT developers (see list of attendees).

The session opened with speaker Javier González (FLC International Project Manager) who explained to the audience an overview of the **initiatives funded by the European Commission** in which the FLC is working, on its firm commitment to be at the leading-edge of vocational training innovation in the construction sector. Among them, the Construction Inheritance project funded under Erasmus+ programme, call 2015.

Project leader presented other European projects developed by FLC, and verbalized the need of fostering synergies with other fields of training as well as potential strategies to widen synergy actions to ensure traditional knowledge preservation with other related sectors with the same challenge regarding generational change.

The pooling of results allows others to benefit from the different activities and experiences of Erasmus + program. Moreover, results achieved with projects can serve as an example to improve awareness of the opportunities offered by the program and enhance the European added value of the activities supported by Erasmus +. This may contribute to a positive public perception and encourage greater participation in European partnerships.

Project presentation by Javier González, at Infoday 1

Project presentation by Javier González, at Infoday 1

On behalf of project partner BzB, Frank Bertelmann-Angenendt (BzB Project Manager) presented the LdV project InPhaseOut (“Training Course with intergenerational mentoring system regarding old building rehabilitation”, 2012-1-NL1-LEO05-08715) in which Construction Inheritance is inspired for a further development: main objectives, results achieved and challenges identified to be addressed within Construction Inheritance project.

Project presentation by Frank Bertelmann-Angenendt, at Infoday1

Third speaker, Beatriz Oliete (FLC International Project Researcher) made a **deep presentation** concerning the main characteristics of **Construction Inheritance** project: aims, partners, funds, schedule, activities, all intellectual outputs and expected results.

After that, Javier Gonzalez opened a **debate** to encourage the active participation of attendees -potential stakeholders at territorial and sectoral level- and thus exchange ideas.

Project presentation by Beatriz Oliete, at Infoday1

Attendees at Infoday1

Exchange of views: Construction InHeritage training programme and its impact in VET systems.

As said, the event was organized together with the first transnational partnership meeting envisaged in the project. A great advantage of organizing an info-day with stakeholders coinciding with the transnational meeting is that both, international consortium as well as national participants can **share opinions and experiences** concerning the topic, giving a clearer picture of the construction sector context in EU and about potential pitfalls and assets for project success.

During the debate, some key ideas were put on the table, mainly regarding the use of the technology to address the preservation of know-how and to foster the transfer of knowledge within traditional construction techniques, in particular for rehabilitation of antique constructive elements.

Thus, some topics came to light:

- The use of ICT may be very useful to train people with no study habits, like non-qualified building workers. The ludic part of the course can catch these workers attention, making learning process effortless or, at least, less tough than being passively in classroom.
- Technology catches the younger's eye, but it is important to ensure that the learning contents get adequately assimilated by the students. It is essential for trainees to make an effort in giving value in what they are learning.
- There have been different learning tools before. Good books and manuals have been written in many topics; nowadays, this support is based on technology. The main difficulty then and now is to adequately reach the target. Thus, it is very important to ensure a clear and dynamic focus on user's needs. Many books stay on shelves for ever. It is very important to ensure notoriety of the training tool: for that, target groups (VET centres, trainers and trainees) should be aware of the availability of this material (App).
- Trainers considered this tool can be most suitable to be used by teachers in classroom as an enjoyable supporting training tool. Then project partners clarified that replacing traditional training methods is not the intention of this project, but to explore innovative ways of training, especially in the practical application of theoretical concepts, being this crucial to reach lifelong learning European objectives.
- The overall purpose of all must be to ensure an effective learning process and knowledge transfer. Technology must be at the service of learning and not *vice versa*.

- Other concern was about digital skills (the capacity of a person to use ICT devices and applications in order to access and manage information and solve problems). Do construction workers have enough digital skills to properly use this tool? Results from previous projects carried out prove young workers/trainees of construction industry do certainly have good digital skills, so this issue does not appear challenging to reach our target group (i.e. SOMEX 2014-1-BE01-KA202-000875). Nevertheless, it is important to take into account the characteristics of the target group to anticipate their receptiveness to technology. It is also necessary to be aware of the age of trainers, since they will use the application to spread knowledge.
- A potential risk of this project is related to the perception of technology tools by young people, where tech tools not only make everything easier but where even there is no need to learn things because there will be a tool that will do all work for them (as with calculators students forget how to do calculations). However, technology is not everything. If the technology fails, students should know how to do things (for example, how to add). Sometimes the mistake is in the lack of transmission of the tool's value. It is also important to teach the theory together with real practices for the student.

At the end of the debate, participants were encouraged to involve their selves as members of the National Advisory Group (NAG), in support of project execution and external evaluation and validation of outputs.

At the meeting, the hosting organization provided participants with office supplies in gratitude for their attendance, including a **memory stick** that contained the "**Infopack1**" with the most relevant information of project to be divulgated.

FLC corporate office materials given to attendees

Finally, **lunch** was offered to attendees, a space to foster the relationship between attendees and favour synergies within different fields of construction sector involved (companies, VET centres, institutions...) with the same challenge regarding generational change.

Participants

The local **impact of the project** is reinforced due to the info-days. During these events is expected the participation of national and international stakeholders coming from local public authorities, VET centres, companies, etc.

A total of **31 participants** attended the first multiplier event, from which 13 were members of the partnership and **18 external guests**.

Project partners who took part of the event (*not covered with funds for multiplier events*):

Event communication: compilation of news, press articles, etc.

At FLC corporate Website, section “News”. News update about Construction Inheritance multiplier event held in Madrid. Published on 5/11/2015

<http://www.fundacionlaboral.org/actualidad/noticias/fundacion/arrancan-los-proyectos-erasmus-construction-inheritance-y-hs-serious-games> [Accessed 19/01/2016]

The screenshot shows the website of the Fundación Laboral de la Construcción. The header includes the organization's name, logo, and contact information (900 11 21 21). A navigation bar lists various sections: FUNDACIÓN, FORMACIÓN, SEGURIDAD Y SALUD, EMPLEO, and a handwritten 'BLOG'. Below this, there are buttons for 'TRABAJADORES' and 'EMPRESAS'. The main content area features a search bar with fields for 'Palabra clave', 'Mes', 'Año', and 'Tipología', along with a 'Buscar' button. The news section is titled 'NOTICIAS' and displays a date '05/11/2015'. The headline reads: 'Arrancan los proyectos Erasmus+ Construction Inheritance y H&S Games, liderados por la Fundación Laboral de la Construcción'. The sub-headline states: 'Ambas iniciativas europeas fueron presentadas la pasada semana en la sede de la entidad paritaria en Madrid'. The article text describes the launch of two European initiatives, 'Construction Inheritance' and 'H&S Games', led by the Fundación Laboral de la Construcción. It mentions that the launch took place at the organization's headquarters in Madrid. The article also notes that the Fundación Laboral has already celebrated the first meetings of these projects, which include the K2 action line (Cooperation for innovation and the exchange of good practices) of the European Commission, with the objective of promoting 'strategic associations' in favor of improving professional training. The 'Construction Inheritance' project is based on the transfer of knowledge from experienced workers to younger ones, aiming to develop an 'App' of character formative to recover traditional productive processes of the sector that are being lost. The 'H&S Games' project is aimed at developing formative games on safety and health for learning through mobile devices, directed primarily at unqualified migrants who also have difficulties with the language. The article lists the partners of the entity paritaria in the project: Sataedu Satakunta Educational Federation (Finlandia); Open Universiteit Nederland (Holanda); Handwerk-Nrw (Alemania); FRG Timisoara (Rumania); Warrington Collegiate (Reino Unido), and Centro Edile A.Palladio (Italia). At the bottom of the article, there is a link to 'Citras noticias >' and a section titled '* Conoce todos los proyectos internacionales en los que trabaja la Fundación Laboral de la Construcción.' This section includes the European Union flag and the text 'Supported by the Erasmus+ programme of the European Union'. Below this, there are social media sharing buttons for 'Imprimir', 'Enviar a un amigo', 'Recomendar', 'Twitter', 'G+', and 'Share'.

Infoday 2: L'Eredità di la Edilizia. Il restauro tradizionale di edifici antichi in Europa

Bari (IT) | 15th April 2016

Event Description (summary)

The **Infoday2** is the second multiplier event envisaged within project implementation; an information day intended for **an overall project presentation of project and a presentation of the Handy Guide (O1)** about traditional restoration in Europe, as well as debating with experts about the Knowledge, Skills and Competencies needed for restoration works (O2).

The dissemination of experiences of the participant observation (activity planned for O1) on traditional working processes, methods, materials and techniques in rehabilitation and restoration of historic buildings in Europe (specifically in Spain, Italy, Portugal, France, Belgium and Germany) was the centrepiece of the event, ensuring a good promotion of all innovations and good practices of refurbishment works among Europe. The Italian case of restoration of an antique building analysed during project was thoroughly presented to audience with the screening of a video made ad hoc and a lecture of the architect in charge of the case.

Also, Italian partners presented the National Advisory Group (NAG) created with the intention of synergies between the NAGs and partnership as for setting up the basis for Standard recognition of the Learning Outcomes (O6).

The event was planned as one day conference with the participation of the partners involved in project's development: Fundación Laboral de la Construcción (Es), CENFIC (Pt), BzB (De), FORMEDIL Puglia (It), IFAPME (Be), CENFIC (Pt) and CCCA-BTP (France).

The event was conducted by project partner **FORMEDIL PUGLIA**. The conference had duration of two hours, attended by representatives of public authorities, construction companies, professionals and VET centres (see list of attendees).

Participants

A total of 36 people participated in the second multiplier event, of which 17 were members of partnership entities and 19 guests from local public authorities of territorial and sectoral levels, training centres and companies.
