VIRTUAL REALITY APPLIED TO
ROADWORK TRAINING IN
EUROPEAN CONSTRUCTION
INDUSTRY

Why VRoad?

Road work is essential to extend the life of transport infrastructure, which benefits the social and territorial cohesion of the European Union by promoting economic development and job creation.

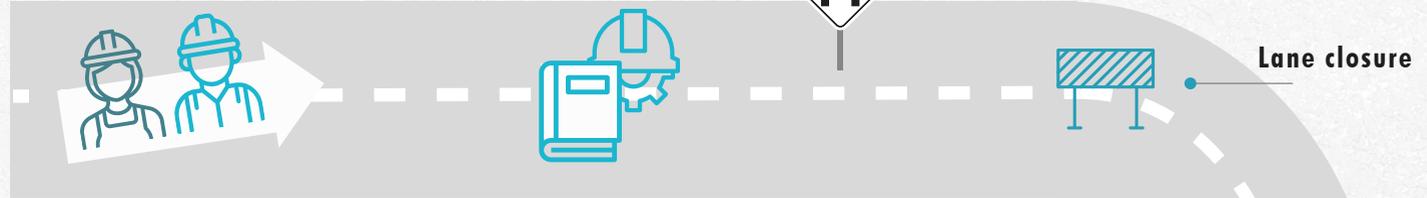

To improve training

1

Handy guide with the knowledge and skills necessary to ensure the safety of COEX professionals

2

Application of Virtual Reality in three daily work scenarios:

4

Recognition of the Health and Safety knowledge acquired by professionals through the application

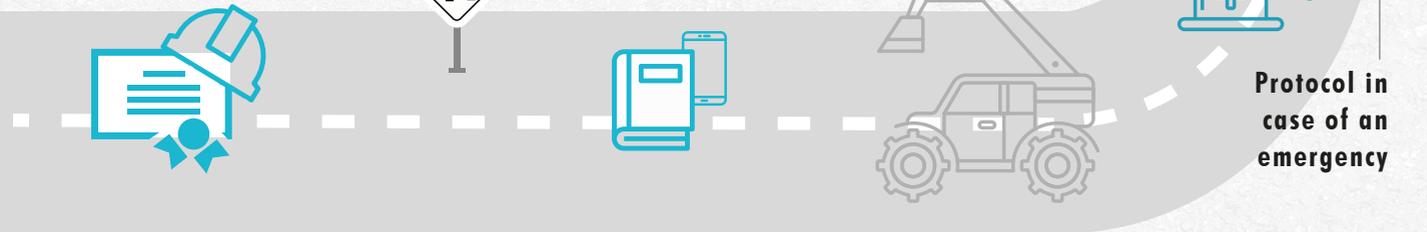

3

Didactic guide for teachers in the sector to manage the application

Repair of guardrail and traffic signs

Protocol in case of an emergency

The goal is the sector

Improve risk prevention in road maintenance work

Implement pedagogical innovation in road maintenance work

Promote the acquisition of teaching skills
